

## 2.2 - Technical requirements for the moveon management module

This document describes the technical requirements which your institution must meet before installing the moveon management module.

### 1- Server hosting the moveon database

moveon requires the use of one of the following databases:

- **MySQL** version 4.1.22 or later
- **PostgreSQL** version 8.1.15 or later
- **Oracle** version 8i or later
- **MS SQL Server** version 2000 or later
- **MS Access** version XP or later

### 2- Workstations using the moveon client

The following software must be installed on each workstation using the moveon client:

- MS Access version XP, 2003, 2007 or 2010
- MS Word and MS Excel version XP, 2003, 2007 or 2010
- The latest Office Service Pack
- ODBC driver appropriate to the SQL database (if an SQL database is used)

NB: If an MS Access database is used, all workstations must be running the same version of MS Access.
